

My Very Own Kangen Car

Promoting Kangen Water with Eye-Catching Two-Tone Truck!

Two-tone black & white Kangen Truck 6A2-3 distributors, Andy & Carmen

One of our leading Hong Kong distributors, Andy Lau, who has worked his way up to the rank of 6A2-3, along with his wife, Carmen, has proven just how committed he is to the mission of promoting Kangen Water. Andy, who is a fan of pick-up trucks and is an owner himself, has recently given his already cool ride an even cooler Kangen makeover.

With the word "Kangen" in black racing across its white body, the truck has been transformed into a unique two-tone combination. As it is common in Hong Kong to see many designs and decorations done in red, the black and white promise to stand out in contrast. "This design will surely attract many people's attention and will help to promote Kangen Water in Hong Kong," says Andy happily.

Aim for social well-being!
Let's Unify!

Obtain True Health and Wealth Through the Precious Gift of Enagic!

Balazs W. Kardos (6A2-3)
& Malgorzata Salek (6A2-2)
[Canada]

Balazs W. Kardos was first introduced to Kangen Water through his mother, Zsuzsanna, in 2008. Balazs had been suffering for many years from health issues, and it was during Zsuzsanna's search for a cure that she finally stumbled upon Kangen Water. Her deep, motherly devotion to her son led to the family's use of a Leveluk unit and eventually to her becoming an Enagic's distributor.

As Balazs began drinking Kangen Water for his health, he also tried his hand in the Enagic Business, though "after being ridiculed by friends and family," his first attempt lasted no longer than a few months. Five years later, in March of 2013, he officially began his business in earnest. Since then, Balazs has been making great progress, quickly stepping up in rank and reaching 6A2-3 in June of this year. Now, together with his fiancé, Malgorzata (Margaret) Salek, who is a 6A2-2 distributor, Balazs is striving every day "to keep building and creating more opportunities to change many more lives."

When Balazs, who has now achieved great success through Enagic, was asked to elaborate on the positive outcomes of joining the business, he answered, "My life and my family's life have completely changed since joining Enagic... We are able to truly live our dreams, ... travel the world, buy our dream home and live without limits." He continued on to say that they were, "grateful to Mr. and Mrs. Ohshiro, the entire Enagic community and our whole organization. ... Without you none of this would be possible. Thank you!" (Cont'd to P5)

GLOBAL FOCUS ON

Welcome to Enagic E8PA Main Hall!

The facility, colored in Enagic blue.

Enagic E8PA Main Hall is the core building of the resort located on the premises of Enagic Sedake Country Club in Sedake, Nago City. The Hall has various facilities including lodging, restaurant, café, kitchen, archive room, shop for Enagic related goods and even a gallery that displays the photos of 6A2-3 distributors. The facility is ideal for holding seminars and training sessions or even just for relaxing, as it also provides a large bath hall.

This all-inclusive facility of Enagic Resort in Sedake, Nago, patiently awaits your arrival.

Enagic Event News

Japan

Transforming into royals of the Ryukyu Kingdom in front of Shurei gate.

Grand Ceremony for Opening of Enagic E8PA Main Hall in Okinawa! Participants also enjoy Sightseeing and Charity Events!

Oct. 27 – Savor Okinawa through Sightseeing and Golf!

On the eve of the Enagic E8PA Main Hall opening event, a tour around Okinawa and a commemorative golf competition at Nago City's, Enagic Sedake Country Club, were prepared for the foreign distributors visiting the island. The aim of the two recreational events was to provide a chance for our distributors to refresh their bodies and restore their spirits from their busy lives.

The visitors toured the historical heritage site of the Ryukyu Kingdom, Shurei-mon and Shuri castle, and stopped by Enagic Bowl Mihama to enjoy a game of bowling. In the morning, they also visited a couple of places including the internationally famous, Churaumi Aquarium. The foreign participants were delighted to be able to experience the "then" and "now" of Okinawa.

A group of visitors, who instead chose to play golf, was joined by CEO Hironari Ohshiro in the commemorative competition. They were wholeheartedly engaged in the game as they made their round through the 18-hole course surrounded by the nature of Oura Bay and the hills of Sedake No Mori. The scores of each player have not been disclosed, as they seem to have become a "company secret."

The visitors enjoy bowling at Enagic Bowl Mihama.

The variety of marine life displayed in the Churaumi Aquarium amaze the visitors.

A friendly photo session before the battle of golf.

Mr. Ohshiro's dynamic shot!

Oct. 28 – Exciting Day of Main Event and Visits to Enagic Related Facilities!

Visitors observe the production of Kangen Ukon Σ at the Ukon Factory.

Before the commencement of the main event of the Enagic E8PA Main Hall opening ceremony, the overseas distributors visited the Enagic related facilities located in Sedake, Nago City. The visitors observed the production process of Kangen Ukon Σ at the Ukon Factory and also visited the CEO's childhood home, Sedake No Ie. Then, they moved on to participate in the special training session provided by Master of Global Training, Katsumasa Isobe. All members gave their full attention to the teachings of the master.

After the full schedule of training and touring, the opening ceremony for the Main Hall finally commenced. At the entrance of the hall, a ribbon-cutting ceremony was performed by Mr. Ohshiro and the leading distributors from various countries.

Afterwards, the participants moved into the venue inside the hall and witnessed a dynamic ritual, the Kagami-wari (breaking open of a ceremonial sake barrel), which opened up the event.

Okinawan culture was in full display with performances of Ryukyu dance and eisa warming up the audience. The certification ceremony followed, as Indonesia's Aditya Novriansyah and Wikan Handono, who have both reached the 6A2-3 rank, and Andhyka Putra Sedyawan, reaching the 6A5-4 rank, were presented with certifications and bonuses from the CEO. As the event wound down, some of the participants took to the stage to show off their vocal talents, and the party ended in a lively atmosphere as the song "Fukuju No Hana" was led by a sanshin and yotsudake performance by Mr. and Mrs. Ohshiro.

Master of Global Training, Katsumasa Isobe, holds a special seminar.

The CEO and leading distributors perform a ribbon-cutting ceremony.

Aditya Novriansyah (left) and Wikan Handono happily accept their 6A2-3 certifications.

CEO Ohshiro speaks of the role and purpose of the Main Hall.

Okinawa's Ishii group also participates in the event.

Andhyka Putra Sedyawan receives his 6A5-4 certification from Mr. Ohshiro.

The leading distributors from around the world surround Mr. & Mrs. Ohshiro after the event.

Oct. 29 – Contributing to Society with Special Golf Competition!

The 5th Special Olympics 2016 Kyushu / Okinawa Golf Competition was held in Enagic Sedake Country Club. Special Olympics is an international organization that provides opportunities related to sports to children and adults with intellectual disabilities for the purpose of aiding independence and their involvement in society. The competition was held in cooperation between Japan Special Olympics and Enagic as part of Enagic's mission to contribute to society.

VISITING KANGEN OFFICES OF THE WORLD

Enagic Base of Operations run by Married Couple
Hong Kong

Hong Kong has become well-known for the number of Kangen offices that can be found there, and in fact, it's become a hub for distributors who are passionate in their business. While most of these offices are run by teams of distributors, families and siblings, it is also not uncommon to see offices owned by married couples. Kong Ho Pak and Wong Tin Lok can be added to that list though, as together, they recently opened an office in Hong Kong, which they named, Great Cypress Group Company Limited.

Though the two are still young, they have already achieved the rank of 6A2-2 and are leading an enormous group of distributors. The glorious 6A2-3 rank is just within reach for the couple. "We are very happy, since it was one of our dreams to own a Kangen office of our own. We were especially touched when many fellow distributors and Enagic staff showed up to the opening party in celebration," said Pak and Lok. The two have gained the strength and resolution to further expand their business, as they embark on a new journey surrounded by first-rate comrades.

A scene from the opening party of the new office. The owners, Wong Tin Lok (3rd from left) and Kong Ho Pak (behind Lok).

Many people rush to celebrate the opening of the new office.

The Leveluk series are displayed on the wall inside the office.

Balazs W. Kardos (6A2-3) & Malgorzata Salek (6A2-2)

(Cont'd from P1)

Although Balazs has now reached the rank of 6A2-3, looking back on his journey, he admits to encountering various difficulties. He had especially found trouble in the pitfalls of team building. These pitfalls came in the forms of friction and unnecessary challenges caused by miscommunication. Still, Balazs is confident in both his team's and his own ability to triumph over these obstacles, "Just as quickly as these moments arise we quickly resolve them. We Learn, We Grow, We Thrive."

Overcoming numerous hurdles, Balazs speaks of his vision for the future, "As for my future goals all I can say is, the future is limitless." And as for this year's theme of "Dream Big" he says, "The team and I have been reinvigorated by this idea and really have taken this as a challenge to impact more people, more families and want to see more communities have access to this precious gift of Enagic. The vision is to see many obtain true health and true wealth leading to an age of prosperity globally." Balazs is absolutely unstoppable in his pursuit for this ambitious and grand vision.

Balazs participates in the Las Vegas Convention in July with his family. (From left) His brother, Dave, Balazs himself, his fiancé, Margaret, and his mother, Zsuzsanna.

From Okinawa to the World! The Success Story of Hironari Ohshiro

Chapter 14

Toshio Maehara

Dreams aren't for dreaming

Hironari Ohshiro, the man this book is about, always saw Okinawa as the center of the world, no matter how many times he spun the globe, no matter wherever else he went. He quenched his thirst for global success right from this tiny island. In 2002, Ohshiro saw his dream take off to Tokyo. The next year, in 2003, he set up a small office in Los Angeles. Twelve years later, his business is active in the States, Canada, Mexico and a number of EU member countries, as well as in new markets in Asia and South America. He has now introduced Kangen Water® to more than twenty national markets around the world.

"Dreams aren't for dreaming, they're for making come true". It's something Ohshiro often says. We cannot aim for success without having dreams in the first place. But many people see their dreams collapse and die. How big you dream is a reflection of how big you are. You cannot fit something large into something small. Everyone knows this to be the truth, and yet still, so often, this fundamental truth turns hollow when action is required. Having goals and working towards them is what enables us to gradually turn our small receptacle into something wider and deeper and large enough for our dreams.

Akio Morita and the men with whom he cofounded Sony had big dreams: to rebuild Japan and enrich its culture. Their endless energy meant that, after not too long, everyone in Japan—and, thanks to globalization, the world—had heard of their Sony. Steve Jobs, before his untimely death, had a dream: to make "a dent in the universe". A space-sized dream. He wanted his identity to leave a small yet palpable mark—a dent—in the universe. But has Jobs' stellar record of innovation and discovery really only left a dent, a fingertip-sized dimple, in our universe? He passed away while still young but the legacy of his boundless dream will surely never be forgotten.

It's been said that more than 90% of successful people have dreams and set goals. These aren't the sort of dreams that pop into your head by coincidence, unexpected ideas as random as the lottery. Deep down, everyone already knows this. We should have goals in life. We should be working toward those goals. Ohshiro did, and while there was much to overcome and many dues to pay, today he presides over a global company. It doesn't matter if you're from the tiniest island; you can still trade with the entire world. Your dreams are the propellers on which you can soar to success.

● Author's Profile

Born in Okinawa in 1941. Maehara graduated from Naha Commercial High School in 1960. After attending the University of Hawaii, he graduated with an MBA from the University of Southern California Graduate School and with an MA from the Fuller Theological Seminary. He is now actively working as a consultant at a Japanese firm and is also a minister. He is the advisor of Enagic USA.
Other major works by the author: "The Rules of Business Taught by the Bible" / "Quenching the Thirst for Global Success"

沖縄から世界へ! サクセスストーリー 大城博成

第14回

前原利夫

夢は夢みるものではない

これから紹介する人物は自分の指で地球儀をぐるぐる回しながら、ふるさと沖縄を世界の多くの国々の真ん中に置いた。そして、小さい島から世界を飲む人だ。2002年、大城は沖縄から東京に夢を走らせた。翌年、2003年、ロスアンゼルスに小さな仮事務所を構えた、あれから12年、アメリカ、カナダ、メキシコ、EUマーケット、アジア、南米に新市場の事業展開を進めている。まさに、世界に還元水を紹介し、今は20カ国に展開している。

大城は、「夢はみるものではない、達成するものだ」と口癖のように言う。夢をみなければ達成点に向かわない、しかし多くの人が「夢倒れ」しているのではないか。夢の大きさはその人の大きさだ。小さな器には大きな物は容れられない。人はこの真理を知っているのだが、実行となると真理は空虚な姿に変身することしばしばだ。目的に生きてこそ、入れたいものに沿って器の輪を広げていくものだ。

ソニーの盛田昭夫氏や創業者たちは「日本再建」「文化向上」の夢を描き、そのエネルギーはついに日本はもちろん、世界中に及び、今、ソニーのブランド名を知らない人はいない。若くして他界したスティーブ・ジョブ氏(Steven Jobs)の夢は“A dent in the Universe”であった。この夢は宇宙大である。Dentとは「くぼみ」、そのくぼみを宇宙の彼方に自分のアイデンティティーとして残しておきたかったのであろうか。ジョブ氏の発明、発見の偉業も宇宙の中では指先のくぼみのようなものであろう。若くして他界したが、彼の宇宙的な夢は忘れられることはない。

成功した人の90%以上が必ず“夢”“ゴール”を持っていると言われる。夢の実現は偶然に訪れ、宝くじのように柵からポタ餅式に手に転がり込むものではない。誰でもそのことは知っているのだ。目的意識的に生きることだ。大城も多く苦勞し、下積みの中から今日のグローバル企業を育て上げた。小さな島の出身でも世界市場を相手に活躍している。夢は成功のプロペラ、推進力だ。

● 著者紹介

1941年、沖縄県生まれ。60年に那覇商業高校卒業。その後、ハワイ大学を経て南カリフォルニア大で経営学修士、フラー神学校で神学修士をそれぞれ取得。日系企業のコンサルタントおよび牧師として活躍中。エナジックUSA顧問。

Special Events held in 8 Locations across Nation!

From August 27 to September 24, special events sponsored by Enagic Indonesia were held in eight different locations all across the nation. Each event, which was also timed to coincide with the end of the Islamic fasting period, saw great success, gathering a total of 1,000 participants. These events were held with the main purposes of providing training for the E8PA, introducing the Demo Kit, and also to allow the service staff to provide instructions on the use and maintenance of machines. Participants in all locations were seen actively asking questions and many have praised the events as, "very informative and educational." It was a fruitful and meaningful occasion for everyone.

Special Events Dates and Locations

- Aug. 27 Bandar Lampung, Lampung
- Aug. 28 Balikpapan, East Kalimantan
- Sep. 3 Semarang, Central Java
- Sep. 4 Yogyakarta, Yogyakarta Special Region
- Sep. 10 Surabaya, East Java
- Sep. 17 Pulau Lombok, West Nusa Tenggara
- Sep. 18 Makassar, South Sulawesi
- Sep. 24 Jambi City, Jambi

A large number of women could be seen participating at each venue. (Left) Makassar venue and Jambi venue.

Enagic Training News

Mr. Isobe Holds Training Sessions in Singapore!

Master of Global Training, Katsumasa Isobe, held special training sessions in Singapore, between October 21 and 22. In spite of the long 9 a.m. to 6 p.m. schedule of the training sessions, the participants gave their full attention throughout the two days. All eyes and ears focused on the teachings provided by Mr. Isobe.

After the training, participants enjoy a photo session with Mr. Isobe (front, 5th from the left)

On page 2 of our October issue, we incorrectly reported the price of the Demo Kit as US\$200. The correct price is US\$300. We sincerely apologize for the mistake and any inconvenience it may have caused.

本誌10月号の2ページでデモキットを紹介したさい、価格を200米ドルとお伝えしましたが、正しくは300米ドルでした。訂正してお詫びします。

Enagic Kangen Rice Project

エナジック還元米プロジェクト

Chapter 8

Zero Detection of 250 Agrochemicals! Electrolyzed Water Rice Farming Pioneers Field of Agroecology

農薬検査250項目で全部ゼロ!
未来の“アグロ・エコロジー”を先取りする電解水稲作

The final stage of harvesting has finally arrived in the rice fields of Ido Agriculture. The Kangen paddy using electrolyzed water (photo ①) and normal paddy using agrochemicals (photo ②) were compared just before harvesting. When viewing the photos below, the difference is quite apparent, as the “weeds” which are abundant in paddy ① (tall plants called millets) are not found in paddy ②. No weeds are able to grow in the normal paddy, as large amounts of pesticides and chemical fertilizers are used. The Kangen paddy, filled with weeds, proves how safe and reliable electrolyzed rice farming is.

The safety of electrolyzed rice farming has also been proven by science. The rice harvested in September underwent a series of testing at the Environmental Research Center (Ibaraki Prefecture) and has received an all clear in 250 items of agricultural chemicals, including DDT, as they were “undetected” during testing (photo ③). This electrolyzed water rice farming that is free of pesticide residue, is an advanced farming system that is in line with the future standard of agroecology.

After the harvest, Ido Agriculture uses a special machine to hull the rice, separating it into brown rice and husk. When it has been screened for quality and is rid of waste and other foreign substances, it is put through a drying process, reducing the moisture level to approximately fifteen percent. Then, the brown rice is packed in one-ton bags and is sent to the milling and packaging company.

The milling and packaging company, Kuriya (Kagawa Prefecture), is a long-established company that has been in business for 134 years. The Kangen Rice is milled, screened, weighed, packaged and vacuum-sealed there before reaching the consumers. In fact, Kuriya is so thorough in their sanitation management that they also use electrolyzed water in the process of sanitizing and disinfecting the facility (photo ④). The Kangen Rice created by the “electrolyzed water trio” of Ido Agriculture (production), Kuriya (milling and packaging) and the maker of electrolyzed water generators, Enagic (sales), will be available for sale around the world starting this year.

Most of the weeds found in the Kangen paddy are millets.
「還元田」に茂る雑草の多くが背の高い粟

No weeds can be found in the normal paddy using agrochemicals.
農業使用で全く雑草が見られない「一般田」

Kuriya's packaging machine is disinfected with electrolyzed water.
電解水で消毒する「くりや」の包装機械

A test result of “undetected” fills up the report made by the Environmental Research Center. 「環境研究センター」の検査結果には農業を「検出せず」だけが並ぶ

いよいよ最後の刈り入れの時節だ。そこで刈り入れ直前の一般の田んぼと井戸農産の電解水稲作の田んぼ(還元田)を比較してみた。上記の写真では①が還元田、②が一般田である。一目瞭然、①では②には見られない「雑草」(背の高い植物は粟)が盛大に茂っているではないか。一般田では農薬・化学肥料を大量に使用するから自ずと雑草の類は生育しない。還元田はその逆。雑草が茂る還元田の電解水稲作こそ、いかに安心安全な米づくりをしているかを証明している。

もう一つ、その安全性を「科学」が証明した。9月に刈り取った還元米を「環境研究センター」(茨城県)で検査したところ、DDTなど250項目におよぶ農薬類すべてで「検出せず」の結果を得られたのだ(写真③)。残留農薬ゼロの電解水稲作こそ未来の“アグロ・エコロジー”を先取りした先進的農法である。

収穫された還元米はまず、井戸農産の機械で籾殻を取り除いて玄米にする。もみすりや、優良米と不良米の選別、ゴミ・異物などの除去をおこなってから米の水分が15%前後になるよう乾燥させる。そして1トン袋に玄米を詰め込んで精米・包装業者へと送っていく。

業者の(株)くりや(香川県)は創業134年になる老舗。ここで還元米は精米・選別・計量・充填・真空パックされ、その後、わたしたちの手元に届くのである。実はくりやも電解水を用いて機械類を徹底的に消毒・殺菌するなど衛生管理が行き届いた会社だ(写真④)。生産者(井戸農産)、精米・包装者(くりや)、そして電解水生成器メーカーで販売者のエナジック。この“電解水トリオ”が生み出した還元米は今年から世界中で販売される。

Challenge to remove soy sauce stain with strong Kangen water!

Oops! I've just spilled soy sauce on my clothes. What am I going to do now? It's even worse because out of a number of liquids, soy sauce is said to be the hardest to remove (TT).

If I don't do something quickly, it will get even harder to clean. But I can't rub the stain because that is supposed to make it even more difficult to remove.

■ Attempt with detergent and benzene!

The first thing I tried was to lightly tap the stain with a wet towel. Then I put a little detergent on the towel and repeated the process. To finish off, I wiped the stain with a clean, wet towel. But the stain was still there so next I tried dropping a little benzene on a towel and tapping the stain with that. Even that didn't work (^^;;).

■ Scrubbing the stain just made it worse!

When the detergent and benzene didn't work, I tried putting detergent on the stain and giving it a good scrub. It must be my short temper, but even though I knew the stain wouldn't come out, I kept on going... I remembered hearing before that it was good to put strong Kangen water in with the washing so I wondered if it would work to remove stains.

■ How does strong Kangen water remove stains?

Just as I had expected, it worked. The saponification, emulsification, dispersion and desorption action of strong Kangen water, lifts oil and other stains right from the fabric. All you have to do is replace the detergent you are currently using with strong Kangen water.

However, because of its strong alkalinity with a high pH, care should be taken when using it with animal fibers, such as silk and wool. Using strong Kangen water, even I can remove stubborn stains (^^;;).

強還元水を活用し醤油のシミ抜きに挑戦!

しまった! 着ている服に醤油をこぼしてしまった! あーあ、参ったなあ。醤油は数ある「液体」の中でシミ抜きが最もむずかしいとされているからなお困るんです(TT)。

とにかく早めに処置しないと、汚れがとれなくなります。でもシミがついたところは、こするとよけいに落ちにくくなるといわれていますからそれはできません。

■ 洗剤&ベンジンでは落ちず!

そこでまずシミがついたところを、水を固く絞ったタオルでポンポン叩き、次に中性洗剤をつけてまたポンポンと叩いてみました。そして仕上げは水を絞っ

たタオルで拭き取る、というやり方をしてみました。

しかしうまくいかなかったので、次にベンジンをたらししたタオルでポンポン叩くということもやってみたのです。でも、きれいに落ちないんですね(^^;;)

■ ゴシゴシ洗いはよけいダメ!

これらの方法でダメだったから、洗剤につけてゴシゴシ洗いしてしまったんです。どうも気が短いせいか落ちないとわかっていても……。

しかしながら以前、洗濯に強還元水を使うとよいと聞いていたので、ではシミ抜きにも活用できるのかな? と

思って試してみました。

■ 強還元水で落ちる理由は?

そうしたら、やっぱりシミ抜きにも効果を発揮するのです。強還元水は酸化作用・乳化・分散作用・汚れの脱離作用があり、油脂分などの汚れを浮きださせてくれるのです。今まで使っていた中性洗剤を強還元水に替えればいいんですね。

ただしpHの高い強アルカリ性ですから、動物性繊維の絹やウールは要注意です。とにかく強還元水を使うなら、わたしにもうまくシミ抜きができるのですよ(^^;;)

Ceragem Kangen Wellness Center

Refresh your Body by Collaboration of Kangen Water and Massage!

還元水とマッサージのコラボが生む身体のリフレッシュ!

Richard Cheng, who took part in the Global Convention held in July. 7月のラスベガス・コンベンションに参加したリチャード・チェンさん

Everyday is a busy day for Richard Cheng, who is a certified senior trainer at the Ceragem Kangen Wellness Center. Ceragem, which is gaining popularity in Japan lately, is a kind of therapy using special thermal massage beds. Cheng, however, strongly believes in combining Kangen Water with Ceragem therapy to achieve the most effective results. The therapy is offered in each of his five centers, located in Ontario, Toronto West, Toronto (Downtown), Hamilton, London and Brampton.

Cheng was first informed of Kangen Water by his father in 2009. He soon purchased Leveluk units for use in the wellness centers and in his home. Though at first, he was slightly unsure of the water's effectiveness, he quickly became convinced and began to offer it even to the visitors of his centers. "We wanted to provide the best and healthiest water available to our customers," explains Cheng of his decision to use Kangen Water.

At his centers, customers "tune up their fundamental body systems" by receiving a massage on the thermal bed. Then, they are given Kangen Water to further stimulate metabolism, which helps to refresh their bodies.

As Cheng continued to offer Kangen Water along with the Ceragem massage in his facilities, he began holding Kangen Water demonstrations and officially embarked on his journey as a distributor in 2013. "We wanted to share all of what Enagic has to offer, not just the physical health," says Cheng. As a result, this year, he was able to reach the rank of 6A2-2 and also managed to tie the knot with a wonderful woman. With all the accomplishments under his belt, it is no doubt that Cheng considers 2016 to be "a very big year" for himself. Congratulations to Richard Cheng!

リチャード・チェンさんは「セラジェム・カンゲンウエルネスセンター」のシニアトレーナーとして毎日忙しい日々を送っている。「セラジェム」とは最近、日本でも少しずつ人気が出てきた、特殊な温熱ベッドでマッサージを施す療法だ。チェンさんはこれをオンタリオ州内のトロント(2カ所)、ハミルトン、ロンドン、ブランプトンの5カ所のセンターで実施している。そしてこの療法に欠かせないのが還元水であるとチェンさんは強調するのだ。

彼が還元水を知ったのは2009年で、自分の父親からだった。彼らが経営するセンター用と自宅用にそれぞれレバックを購入した。還元水について最初はやや懐疑的だったチェンさんだが、すぐにその効果に納得。センターに来るお客さんたちにも飲用を勧めるようになった。「健康的で最高の水

を提供したいと思ったからです」とチェンさんはその動機を語っている。

使い方はこうだ。まずマッサージによって全身の調子を整え、その後に還元水を飲用してもらう。これにより新陳代謝が進み身体がリフレッシュするという。

こうしてマッサージと還元水の併用でお客さんを喜ばせていたが、2013年ごろからチェンさんは「エナジックが提供するレバックをもっと広めたい」と考えるようになり、「還元水デモンストレーション」をおこなうなどビジネスを本格化させた。その結果、今年は6A2-2に到達するという大きな成果を得た。さらに素晴らしい女性と結婚もできたから、彼が「2016年は人生で最高の年」というのもよく理解できる。チェンさん、おめでとう!
